Preface	v
Chapter 1: The e-Infrastructure Challenge – Opportunities and Problems	1
Executive Summary	1
Context	2
The e-Business Space	3
The Applications Space	4
The Players' and Competitors' Space	6
Business Models	6
Values and Dynamics	7
Classes of e-Business	10
Stages of e-Business	11
What Business Wants	13
The Changing Nature of Technology	15
What is Infrastructure?	16
The Facets of Infrastructure	17
<i>Case Report: Dow Corning and Infrastructure</i>	18
The Roles of Infrastructure	18
Operational	18
Risk	18
Potential	19
Flexibility	19
The Distinctive Behaviours of Infrastructure	19
Infrastructure Management	23
Control and Architecture	24
The Infrastructure Perspective	25
Conclusion	25
Key Learning Points	26
Case Study: Macquarie Bank – Providing e-Infrastructure Across Seven Groups	27
Chapter 2: Information Infrastructure for Business-to-Business	39
Executive Summary	39
Context	39
e-Design	40
e-Trading	41
One Seller, Many Buyers	41
One Buyer, Many Sellers	42
One Buyer, One Seller	42
Many Buyers, Many Sellers	44

e-Trading Components	45
e-Planning	47
Demand Planning	48
Vendor-managed Inventory (VMI)	48
Collaborative Planning, Forecasting and Replenishment	48
Supplier Collaboration	48
Customer Relationship Management (CRM)	48
e-Fulfilment	49
The Role of Standards	51
eXtensible Mark-up Language (XML)	51
Open Buying on the Internet (OBI)	51
RosettaNet	51
Key Learning Points	52
Case Study: Electrocomponents/RS Components – Building an Award-winning B2B Site	53
Case Study: Travelstore.com	60
Case Study: IBM Procurement – The Challenge of Being Ahead of the Game	70
Chapter 3: Information Infrastructure for Business-to-Consumer	75
Executive Summary	75
Context	76
Use of B2C Sites	76
The B2C Opportunity	77
Successful Examples	78
The B2C Infrastructure Challenge	79
B2C Components	80
Infrastructure Challenges	80
Short-term Operational Considerations	80
Longer-term Enabling Considerations	82
Complementary Infrastructure	82
Conclusion	83
Key Learning Points	83
Case Study: Safeway – From Deep to Pervasive on a Single Vendor Platform 1999–2001	84
Chapter 4: Information Infrastructure for Intra-firm e-Business	91
Executive Summary	91
Context	91
Use of Intranets	92
Actual Use of Intranets	93
Internal e-Business Successes	95
Infrastructure Issues	96
Technology Platform	96
Skills	97
Suppliers	97
Processes	97
Complementary Infrastructure	98
Conclusion	98

Key Learning Points	98
Case Study: e-Human Resource Management at IBM – New Processes, New Delivery	99
Case Study: IntraComm – Lloyds TSB Corporate and Commercial’s Knowledge-sharing Intranet	104
Chapter 5: Global Infrastructure for Global Business	109
Executive Summary	109
Context	109
Trends in Global e-Business	111
Synergies	111
Local Base, Global Offer	112
Global Collaboration	112
The Effects of Brand Strategy	112
Infrastructure Issues	114
The Global Corporate Perspective	114
The Country Perspective	115
Problems of Global Policy, Local Implementation	115
Conclusion	116
Key Learning Points	116
Case Study: Hewlett-Packard – Invent... and Reinvent	118
Case Study: Chameleons with Cast Iron Skins – Building a Global e-Business Infrastructure at Royal & SunAlliance	126
Chapter 6: Driving e-Business Infrastructure	131
Executive Summary	131
Context	132
Organizing for e-Business	132
The Core Issue	133
What the Business Needs to Understand About IT	134
What IT Needs to Understand About the Business	136
A Story That Executives Will Understand	137
Placing Infrastructure on the Management Agenda	139
The CIO–CEO Relationship	141
Conclusion	143
Key Learning Points	144
Case Study: Customer Service and e-Infrastructure – The Critical Connections	145
Chapter 7: Technology Platform and Architecture	153
Executive Summary	153
Context	154
The Technology Platform	154
Installed Base – Where a Company’s Technology Platform Comes From	154
New Technologies – Where the Company’s Platform is Headed	156
Architecture and Standards	157
Applications Architecture	158
Component-based Architecture	161
Flexibility Through Architecture	161
Integration	162
Security	164

Infrastructure Management Trade-offs	165
Conclusion	167
Key Learning Points	167
Case Study: Oracle – Transforming to e-Business 1999–2001	169
Case Study: Fashioning the Infrastructure Vision at Entertainment UK	179
Chapter 8: The Infrastructure Skills Challenge	185
Executive Summary	185
Context	186
Labour Shortages	187
Staff Turnover/Churn	187
Cost Issues	189
The Changing Skills Base	189
Contractors: How Far a Solution?	189
Culture	190
Recruitment	191
Compensation and Benefits	191
Retention	192
Development	193
Coping With Skill Shortages	193
Conclusion	194
Key Learning Points	194
Chapter 9: Planning, Foresight and Control	195
Executive Summary	195
Context	195
Planning	196
Technology Foresight	198
Control Processes	200
Investment Processes	200
Project Time Frames	202
Conclusion	203
Key Learning Points	203
Case Study: CitiPower – Building and Competing with a New e-Business Infrastructure	204
Chapter 10: Complementary Infrastructure	213
Executive Summary	213
Context	213
Supply Chain Infrastructure	214
Call Centres	215
The Legal Framework	216
Intellectual Property	217
Software and Business Process Patents	217
Content	218
Database Rights	219
Miscellaneous Website-related Rights	220
Conclusion	220
Key Learning Points	221

Chapter 11: Sourcing IT and e-Business Infrastructure – Practices and Risk Management	223
Executive Summary	223
Context	224
Towards a Global Phenomenon	224
Using External IT/e-Business Services: A Complex Track Record	226
<i>Case Report: Siemens, i2 and Strategic Partnering</i>	230
<i>Case Report: United Airlines and Time-to-Market</i>	231
<i>Case Report: American Insurance Group (AIG) – A Mixed Approach</i>	232
<i>Case Report: Commerce Service Provision – Can the Store be Outsourced?</i>	233
Managing the Risks in Outsourcing IT and e-Business	235
Analysing the Risks in Outsourcing	235
Contextual Risks: Competitiveness, Strategic Intent and Vendors	236
Building to Contract: Pitfalls and Pick-me-ups	238
Post-contract Management as Risk Mitigation	240
Risk Profiling: A Summary	241
Emerging Practices and Prospects	241
Conclusion	244
Key Learning Points	244
Case Study: Charles Schwab – Building the Engine-room for On-line Investing	245
Chapter 12: Sourcing IT and e-Business Infrastructure – Development Projects and Strategic Relationships	249
Executive Summary	249
Context	250
Towards Internet Implementation Capability	250
Sourcing e-Development: Internal, External, Partnering and ‘Mixed’ Routes	253
The Internal Development Path	253
External and ‘Mixed’ Development Routes	256
Sourcing and Management of e-Business Projects	261
e-Sourcing: The Role of Strategic Relationships	264
Sourcing IT Capability	264
External Sourcing Around the Customer Resource Life Cycle	265
Developments in the Supply Chain	268
Towards Virtual Integration	271
<i>Case Report: Cisco</i>	272
<i>Case Report: Dell</i>	272
Towards Effective e-Sourcing Decisions	274
Managing e-Sourcing: Core Capabilities for Ongoing Management	276
Comment on the Core IT Capabilities Model	279
Conclusion	280
Key Learning Points	281

Chapter 13: Application Service Provision and Beyond: The New e-Infrastructure?	283
Executive Summary	283
Context	284
Here Come the ASPs: Market Development	285
Understanding the Variety of ASP Offerings	287
<i>Case Report: Corio</i>	292
<i>Case Report: Mail.com</i>	293
<i>Case Report: Vistorm</i>	293
Taking a Customer Perspective	295
The ASP Customer Perspective: A Check List	300
Business Drivers	300
Technology Drivers	301
Economic Drivers	302
IT Services Market Drivers	303
Relational Drivers	304
The ASP Model: Concerns and Challenges	305
Conclusion	307
Key Learning Points	308
References	309
Additional Reading	313
Appendix: Survey Results	315
Index	327
